## ISO 27001

### INFORMATION SECURITY MANAGEMENT SYSTEM

Regardless the size, location or industry; organisations today are more and more relying on technology and information. It has become crucial that your organisation's data and that of your customers are safe and protected.

By implementing an information security management system (ISMS) and gaining ISO 27001 certification, your organisation can ensure you have in necessary the processes and controls to protect your information assets and at the same time meet legal requirements.

### What is ISO 27001?

ISO 27001 (formally known as ISO/IEC 27001:2005) is a set of requirements for an information security management system (ISMS). An ISMS is a framework of policies and procedures that includes all legal, physical and technical controls involved in an organisation's information risk management processes.

According to its documentation, ISO 27001 was developed to "provide a model for establishing, implementing, operating, monitoring, reviewing, maintaining and improving an information security management system."

Certification to ISO 27001 assures customers, authorities and other stakeholders that you are managing all relevant information security aspects. ISO 27001 is aligned with other management system standards, supporting integrated implementation of management systems.

### Why is certification good for my business?

ISO 27001 certification demonstrates that you have identified the risks, assessed the implications and put in place systemised controls to limit any damage to the organisation.

#### Benefits include:

- Increased reliability and security of systems and information.
- Improved stakeholder confidence.
- Legal compliance, such as the EU GDPR etc.

### How can I get prepared for certification?

These are some important steps to take in order to be ready for certification:

- Prepare- Get an understanding of the ISO 27001 requirements.
- Establish the context, scope, and objectives.
- Establish a management framework.
- Conduct a risk assessment.
- Implement controls to mitigate risks.
- Conduct training.
- Review and update the required documentation.
- Measure, monitor, and review.
- Conduct an internal audit.
- Call us for an audit.
